

# VOLUNTEER MANAGEMENT SOFTWARE ROI

Here is a list of the top 5 ways volunteer management software can deliver your organization a return on investment.

## ADMINISTRATIVE TIME SAVINGS

Volunteer management software can greatly reduce the amount of management time required compared to a manual process. Volunteer coordinators and other internal staff can use time savings to focus on building internal/external relationships.

## DECREASED OPPORTUNITY COSTS

Volunteer management software makes the process of creating, sharing, and fulfilling opportunities easy. The process improvements gained through software can reduce outreach and campaign cost increasing the overall value of a volunteer hour for nonprofits.

## CROSS- POLLINATION

Volunteer management software helps nonprofits convert volunteers to donors and vice versa by integrating with CRM to bridge the gap between supporter groups and identify new opportunities for cross-pollination.

## IMPROVED DATA EFFICIENCY

Volunteer management software helps eliminate the risk of data errors, helps nonprofits organize data points, and provides organizations with the analysis capabilities they need to make strategic decisions to push their program forward.
